

Unify Your Institution Through Access to Information and Automating Processes

Modernize How You Get Work Done Through Laserfiche

Easily and securely store and access information when you need it.

Enable seamless access to requests through digital forms.

Automate manual processes for better responsiveness.

Integrate with business systems across your organization.

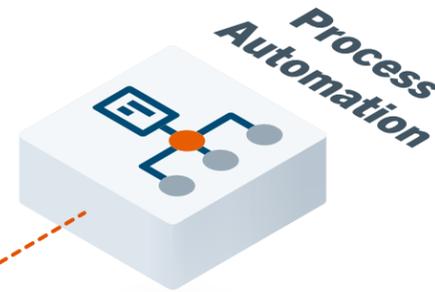

Optimize Departmental Operations, Improve Staff and Student Satisfaction

From the back office to the instructors, everyone in your institution plays a critical role in building and educating our future generation of leaders, employers, innovators—and so much more. Provide your departments with the technology and tools they need to modernize how they enable future generations to be productive and succeed.

Intelligent Data Capture

Meeting the needs of today's students requires cutting-edge solutions. Employ intelligent data capture tools to efficiently process high volumes of data—like transcript processing—to more quickly deliver superior services with increased precision.

Process Automation

Modernize how you process departmental requests, financial aid, parent and student requests, and more. Remove human error, accelerate reviews and approvals, and provide insight on optimizing your organization's workflows for continuous improvement.

Prebuilt Solutions

Get started with Laserfiche workflow automation and forms quickly by using the prebuilt templates created and shared by your peers in education. As a Laserfiche user, you can easily search and access these premade solutions, download them, and begin using them instantly.

Integrations

Connecting your enterprise solutions is key to enhancing transparency and productivity across departments. By eliminating the need to bounce between business systems, you can give staff easy access to the information they need, when and where they need it.

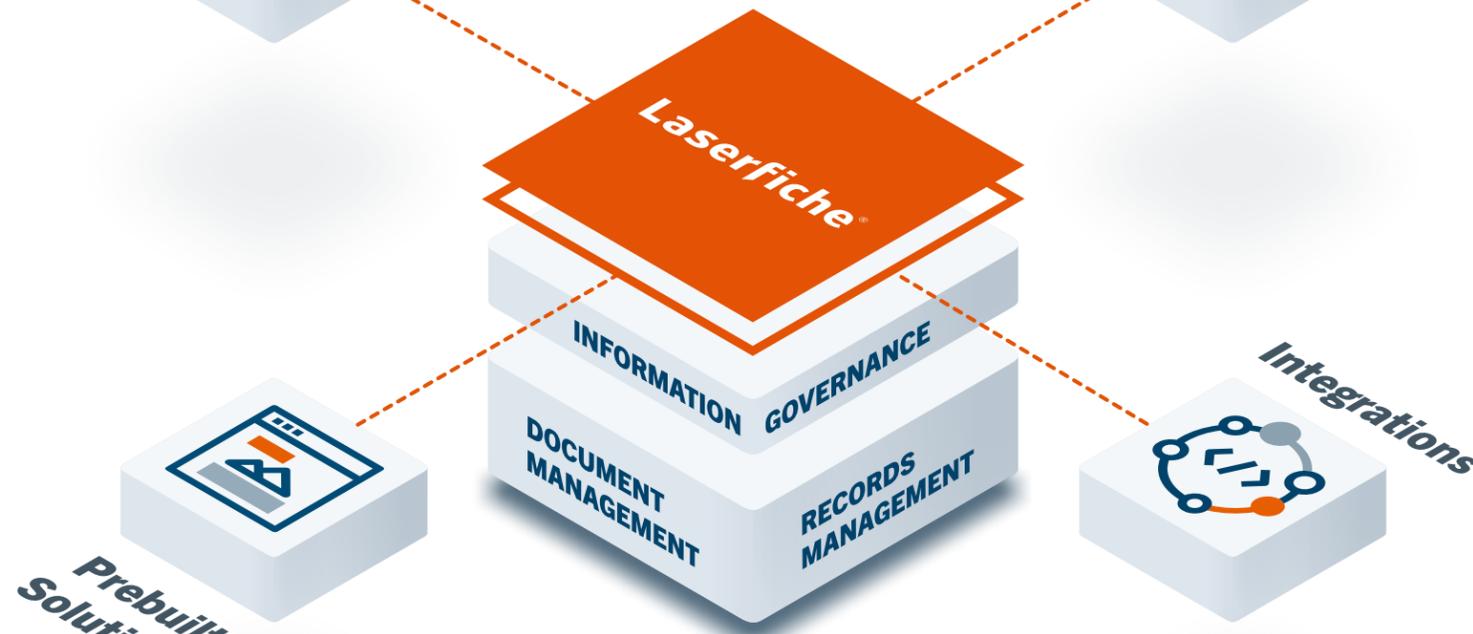

Information Governance

Your students, their families and your staff trust your institution to keep their data secure and provide easy access when it's needed. When you leverage technology to support responsible and secure data management and enable the proper access controls, you are making your job easier while also supporting those you serve.

Document and Records Management

The volume of documents and data your institution collects annually is astounding. Laserfiche helps to simplify how you collect, store and manage this data. Additionally, AI-powered tools can automatically transform your handwritten paper forms into digital assets that are easily searchable, reducing the need for manual data entry.

Benefits That Have Been Realized Through Laserfiche

“Laserfiche has made our agency more responsive and accessible to the public by creating one location where our files are available to anyone with internet access at any time of day.”

— Beverly Strickland, North Carolina Department of Environmental Quality

“We want to be early adopters of international guidelines; we want to make sure that IT systems can keep up as well. Our goal is to enable the organization to evolve with international standards, and we want our practices to be demonstrable, while keeping compliance overhead low.”

— Ed Clague, Isle of Man

“We wanted to bring greater efficiency and cost savings to the county by implementing, maintaining and instructing all county departments on the best practices of using a digital records management system.”

— Maureen Reynolds, Tompkins County, New York

“We’ve gotten great feedback about how quickly approvals are happening now and the ease of access to forms. We only have one location to find forms, instead of lots of different places where people were saving PDFs or filing them.”

— Sheila Andrew, Town of Okotoks, Alberta, Canada

ABOUT LASERFICHE

Laserfiche is the leading SaaS provider of intelligent content management and business process automation. Through powerful workflows, electronic forms, document management and analytics, the Laserfiche® platform accelerates public service delivery, enabling public sector leaders to focus on innovating the citizen experience.

ABOUT ICC INNOVATION

ICC Innovation helps local governments improve records management and streamline everyday processes using Laserfiche® solutions. With more than 25 years of experience as a trusted Laserfiche® Solution Provider, our team supports organizations with implementation, automation, integration, training, and ongoing support. We work closely with public sector organizations to make information easier to manage, workflows more efficient, and services more accessible to the communities they serve.
