

ICC Code Access *Powered by* MUNICIPALITY[®]

A seamless solution to access your ICC Codes directly within Muncicity 5

The integration that building safety professionals have been asking for is finally here! You no longer need to fumble between apps and browser tabs. You don't have to find your hardcopy code book and wonder if it is the most up-to-date version. All the information you need will now be accessible from within the Muncicity 5 desktop. It will be accurate, immediate, and all in one place! Instantly. Digitally. Conveniently.

From the Muncicity 5 desktop, this powerful integration allows you to:

Search relevant and timely code content directly from the Muncicity interface

Avoid mistakes when capturing code citations manually from outdated print or PDF files

Quickly cite Code on violations and complaints

Streamline common code references

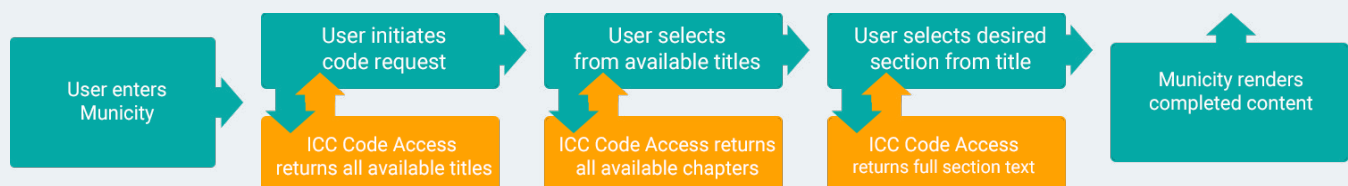

Added codes can be configured to pull into reports, citations, correction letters, and other printouts

Ensure accuracy and compliance with the most up-to-date codes for your jurisdiction

How it Works:

“Easy access to the fire, building, and mechanical codes that I use every day. It is fantastic.”

- David, Engineer

Muncicity 5 also integrates with eCode360[®] for municipalities who have their municipal codes through General Code*

*Available to General Code clients with an active eCode360 product

**ICC Code Access is integrated with Muncicity 5,
the only ePermitting and Code Enforcement software from the International Code Council.
It's ready to add on to installations of Muncicity 5!**

Call today to add ICC Code Access Powered by Muncicity to your installation of Muncicity 5.
Don't have Muncicity 5? Contact us to learn more about this complete ePermitting solution.
